Summary

A qualified IT Professional rich experience in Analyzing, Designing, Development, and Implementation of business applications in Client Server technology and file server technology with an exposure to different platforms and software systems. Possess expertise & experience in Azure C#, Asp.net,Asp.Net MVC, SQL Server, SQLCE, Mysql, Windows Mobile 6.0 Application.

So what makes me unique? # I write clean, dry, solid code that anyone can read using best practices. People I worked with know me as a hard worker. For example, a project I worked on was nearing the deadline, but for reasons outside of our control, we were at least one month behind. I was able to bring our team together, and we were able to finish the fully tested final application two days before it was due. This helped our relation team close a bigger deal with the client, which I am now working.

Experience

Senior Software Engineering Optum (formerly Alere Wellbeing)		Jul 2018 - Present

Senior Software Engineering
Optum (formerly Alere Wellbeing)
Jul 2018 - Present
